Subject: RE: old contamination article, NGWA publication Groundwater Monitoring and Remediation, Summer 2015

Thanks, Kristen. I'll take a look at it.

Any thoughts about trying to meet with the technical team on Feb. 5? I haven't heard back from John Robinson yet, but wanted to check.

Also, I received the requested financial information from the Kozaks and sent it to our reviewer. I hope to get a determination on ability-to-pay soon, maybe this week.

Regards,

Bob

Subject: old contamination article, NGWA publication Groundwater Monitoring and

Remediation, Summer 2015

Good Morning Bob,

Attached is the article I mentioned yesterday that reminded me of our Haskell Lake site. I scanned our paper copy. Please ignore the highlights, I have a habit of highlighting while I read these. What I found interesting was the evidence supporting older contamination developing differently than traditional fate and transport models present at more recent contamination.
